

ML2021Spring HW8 Report

<電機二> <吳冠緯>

<b08901019>

Public Score	Private Score
0.90438	0.89762

The methods I used to pass the boss baselines include:

1. Change FCN autoencoder to CNN autoencoder.
2. Use smaller model (less layers) and smaller batch size (= 1024).
3. Add batchnorm (momentum = 0.01) and train for longer (256 epochs).
