ML2021Spring HW6 Report

<電機二> <吳冠緯>

<b08901019>

AFD	FID
0.744	7211.71

The methods I used to pass the boss baseline include:

1. Change DCGAN to StyleGAN2.　(using the resource that cited in the reference)
2. Adjust network capacity to 32 to improve generation results.
3. Adjust truncation value to obtain better samples.
